

AMAN KUMAR

Ara, Bihar, India

Education

Vellore Institute of Technology (VIT), Vellore	<i>Jul 2021 – May 2025</i>
B.Tech, Computer Science and Engineering	CGPA: 6.50
Sri Chaitanya Vidya Niketan, Visakhapatnam, AP	<i>2020 – 2021</i>
CBSE – XII	78%
Sri Chaitanya Vidya Niketan, Visakhapatnam, AP	<i>2018 – 2019</i>
CBSE – X	76%

Skills Summary

- **Languages:** Java, JavaScript, Python, HTML, Bash
- **Frameworks/Libraries:** Express.js, Node.js, REST APIs, NumPy, Pandas, Scikit-learn, Matplotlib
- **AI/GenAI:** LLMs, Prompt Engineering, Agentic AI, Generative AI, OpenAI APIs, RAG
- **Databases:** MySQL, MongoDB
- **Platform and Tools:** VS Code, Jupyter Notebook, Postman, Git, Github, nginx, PM2
- **Coursework:** DSA, DBMS, OS, OOP, CN, Machine Learning, Deep Learning, Data Science

Projects

Telegram Police Bot

Python, Telegram Bot API, Automation

- Developed a Telegram-based automation and assistance bot for quick communication and alert handling.
- Implemented command-based interactions to provide instant access to information and automated responses.
- Designed notification and alert mechanisms to improve communication efficiency.
- Built a user-friendly chatbot interface capable of handling multiple user requests simultaneously.
- Enhanced response time through automation and real-time message processing.

Cancer Detection

Python, Machine Learning, Scikit-learn

- Developed a machine learning model for cancer prediction and early-stage detection using medical datasets.
- Performed data preprocessing, feature selection, and exploratory data analysis to improve model performance.
- Implemented classification algorithms to predict the likelihood of cancer occurrence.
- Evaluated model performance using accuracy, precision, recall, and confusion matrix metrics.
- Contributed to early diagnosis support through predictive analytics techniques.

Plant Disease Detection

Python, Machine Learning, Image Processing

- Developed an AI-based system for detecting plant diseases using image processing and machine learning techniques.
- Performed image preprocessing and feature extraction to improve disease identification

accuracy.

- Trained and evaluated classification models for recognizing different plant diseases.
- Designed a system that assists in early disease detection and supports agricultural decision-making.
- Improved prediction accuracy through data preprocessing and model optimization techniques.

Achievements & Certifications

- Solved 200+ LeetCode problems.
- Full Stack Generative and Agentic AI with Python – Udemy
- Modern Web Development with MERN Stack - Face Prep
